
Long-term Memory — Honcho Mem0

Release 0.0.1

DATRO Consortium

Apr 14, 2026

CONTENTS

MEM0 MEMORY PROVIDER FOR HERMES AGENT

This plugin integrates mem0.ai with Hermes Agent as an additional memory provider.

1.1 Configuration

Add to your Hermes config:

```
memory:
  providers:
    - type: mem0
      user_id: hermes_user # Optional: defaults to 'hermes_user'
      api_key: ${MEM0_API_KEY} # Or hardcode (not recommended)
      base_url: https://api.mem0.ai # Optional
```

1.2 Environment Variables

- **MEM0_API_KEY**: Your mem0 API key

1.3 Installation

Install the mem0 Python package:

```
pip install mem0ai
```

1.4 How it works

Mem0 serves as a **complementary** memory provider alongside Honcho:

- **Honcho**: Stores structured peer observations about the user, durable facts
- **Mem0**: Provides semantic search over conversation history, recent context

Both can run simultaneously - Hermes queries all configured memory providers.

RELEASE NOTES AND NOTICES

This section provides information about what is new or changed, including urgent issues, documentation updates, maintenance and new releases.

2.1 This Release (Version 0.0.1)

- **2026-Apr-13** - alpha
- **2026-Apr-12** - Draft

2.2 Older Versions

Table 1: Table 1.0 — Older Versions of this Document

Archive Date	Version	Description	Download Link
yyyy-mm-dd	0.0.0	draft	no older versions yet

2.2.1 Version 0.0.1

alpha. nothing more to say.

2.2.2 Version 0.0.0

draft. nothing more to say.

2.3 Known and Corrected Issues

Below is a table of pending issues which have been reported to our team. These issues will be cleared from this list as and when they are remedied.

Table 2: Table 1.1 — Known Issues

Date	Ver- sion	Subject	Description
2026-04-13	0.0.1	theme	made html docs theme match this webapp's website/menu theme
