

Whistleblower Declaration and Affidavit of Sion Hywel Buckler

Name: Sion Hywel Buckler

Former Rank: Acting Sergeant, Royal Corps of Signals (British Armed Forces, 2002–2007)

Alias: @unclehowell

Formal Address: Dinas Powys, Wales

Current Location: Exile between the Dominican Republic and Argentina (2014–present); travelled back and forth to Britain from 2022 to 2025 under employment with the Welsh Government

Family Location: Wife, daughter (and family dog (exported from UK)) reside in the Dominican Republic - Where they will remain until there's justice, a military coup or civil war in Britain.

This document serves as a formal public whistleblower affidavit regarding systemic abuses, criminal activity, and human rights violations committed by or under the auspices of the United Kingdom government, including but not limited to abduction, persecution, property theft, legal corruption, and suppression of lawful rights.

Statement of Position

I, Sion Hywel Buckler, a former British Armed Forces soldier and employee under the Welsh Government (Vale of Glamorgans Direct Payments Scheme - Providing Adult Care for my own grandmother, since no carers were available), affirm that the current governing regime of the United Kingdom has ceased to function within the parameters of lawful democratic governance. Based on direct experience, supported documentation, and repeated infringements upon my person, property, family, and rights, I allege that the UK government and its institutions have engaged in conduct consistent with state terrorism, suppression, and persecution.

Grounds for Declaration

1. State-Sanctioned Abduction and Endangerment of My Son

- **Subject:** My biological son (name withheld for safety)
- **Date of Birth:** 6 October 2013

- **Place of Birth:** Harrogate Hospital, Yorkshire

At 36 days old, my son was removed from our family home without lawful cause or consent. The mother—who I witnessed physically abusing our son—the cause of her running off with our child—fled with him. Between our son's birth and this incident, we sent a letter to the register, in response to their invitation to register our child's birth, conditionally accepting. Those conditions were answers to some questions we had. As a result, lawful registration was never completed, my son's registration was by way of abduction, forced-fatherlessness and under the duress of threat of abduction by the state if refused. To this day I have never had an answer to my questions in my letter. My daughter, a British Subject by descent (born from my wife in 27th December 2023) is (to date) not registered as a citizen of the UK Regime and is actively kept from a physical proximity of the British Isles until justice, a military coup or civil war occurs in Britain. Specifically so she cannot be abducted and enslaved by the Terrorist Organisation UK Regime.

Despite being an active and willing father, I was excluded from my son's birth certificate when it was produced. Later, I provided video evidence to UK authorities showing disturbing ritualistic practices involving my son performed by the maternal family, after abusing and abducting him. Rather than investigating this, UK authorities:

- Attempted and failed to kidnap me ("arrest with no warrant, arraignment with no court summons)
- Attempted and failed to entrap me and get me to purger myself during recorded phone calls
- Dismissed video evidence and a format complaint of police negligence, incompetence and inaction - alleging I am a "fantasist"
- Sought to discredit me (setting up a dedicated website) and initiated unlawful extradition under fabricated allegations of terrorism (failed too).
- Failed to act on known history of abuse within the maternal family (including prior disciplinary actions against the grandfather and mother for child-related misconduct)
- I had to hire private military security (RAF MP Leon Allen & US Marine Lieutenant Colonel Curtis VanSant). Growing that to a uniformed dedicated defense force like a drug cartel lord, after Leon was hospitalized and Curtis went into hiding (Curtis was also a Police Sergeant and Professor of Criminal Psychology in Miami Dade).
- I have been persistently denied access to my son, his whereabouts, or even proof of life FOR 12 YEARS AND COUNTING! This ongoing concealment, aided by law enforcement and judicial systems, constitutes systematic abuse and delay and obstruction of justice.
- I left my military career with honors. I have a 2022 DBS Certificate stating there are no issues with UK Police, no arrests etc. I was awarded life membership to the Royal Signals in 2017. I have a wife and daughter. There is no valid reason to hide my abducted son from me, for over a decade. It's a crime against our

humanity. Its state sponsoring a malicious mother and her family, who should be jailed for her crimes against our humanity.

2. Corruption of Sovereign Withdrawal Mechanisms

In 2014, I went into exile to seek safety from corrupt police attempts to kidnap me and process me through a secret kangaroo court - no due process (summons), or judgement of my peers etc. From overseas I enquired about renouncing citizenship from this British Society turned Terrorist Organisation via Home Office FormRN. Attempts were blocked, official complaints absorbed and deflected. And even the process to renounce further corrupted to prevent me from renouncing. Historically, this process allowed for stateless or sovereign status—this pathway is now utterly inaccessible as the process has been so corrupted by unelected bureaucrats, without the vote or even disclosure to the British public.

As a result, it is no longer possible to reverse birth registration, even my own, rendering my (still living) mothers consent for the UK Government to govern me - non-revocable! This was not her understanding of the contract with the UK Regime where it concerned me, her child. My mother also has a degree in law FYI. A fundamental breach of human rights and evidence of involuntary subjugation tantamount to lifelong enslavement. The only option if you don't enjoy indentured servitude after enslavement at birth, is to be human trafficked to another regime in this cartel of regimes that reject freedom and sovereignty. Going back to being free and sovereign, even through this pre-existing legal and lawful route, is no longer an option. Therefore registration at birth is no longer joining a society but lifelong enslavement at birth into a global cartel of regimes that reject the premise of freedom, sovereignty and God. They clearly want the statism doctrine to be a religion. The Regime has gone rogue. Beyond a nationwide cult. It actually fits the bill of a Terrorist Organisation according to its own criteria of one.

3. Unlawful Acts Against My Property and Person

Following my son's abduction:

- My personal vehicle was stolen from my driveway; police refused to take action
- I was evicted from my home at Stockeld Park without due process or court oversight
- I received threats of false legal charges, with attempted kidnap disguised as arraignment and later arrest and even "checking to see if I was ok"
- Legal proceedings were initiated without legitimate summonses, operating more like "kangaroo courts" designed to silence and disposition me

4. Multi-Generational Targeting and Harm (Indicator of Genocide)

- **Father:** Died under suspicious circumstances following a legal dispute (BP v Buckler, 1987). The matter of the persecution and eventual death of my father was referenced in the House of Lords, with admissions of abuse by BP Properties against my farm and family. Great House Farm was demolished the morning after possession of it was taken via lawfare. Marconi invented the radio from staying with my family at our farm, it was a historic building and should have been protected but a community petition was ignored and application to CADW rejected. (Although CADW listed the neighbouring church the following year).
- **Grandmother:** Suffered fatal complications linked to poisoned hip implants and adverse COVID-19 vaccine effects, dying in 2024 after 2 years of diminished capacity
- **Home:** My property at 40 Lombard St, Barry, was unlawfully repossessed in 2011/12 despite payments of arrears. Manchester Building Society used fabricated cost escalations and claimed human rights law did not apply.
- There's been erasure of my existence from the record of ownership of the above property, and when I flew to United States in 2022, they raised the concern that there was no record of me ever flying anywhere before. All my social media and Google accounts shut down at one point too. I believe I escaped very narrowly.

Upon return from 8 consecutive years of exile in 2022 (I never left the island of DR), I was (after restarting full-time employment in UK) refused housing or assistance with housing, despite local housing being prioritised for non-native populations. Despite me being ex-forces and a war veteran. I spent the first year back, full-time caring for my sick nan, while staying in a tent. My complaint to the Vale of Glamorgan was dismissed.

Legal and Constitutional Position

I formally reject the premise of the UK PM that I need to leave my birthland if I don't want to remain a member of his terrorist organization. Returning to being a democratic, functional British Society or Government is not happening. Freedom, sovereignty, and lawful self-determination are not privileges to be granted by the UK Regime—they are inherent and inalienable and as such, are to be enforced not applied for. But the UK Regime doesn't recognise freedom or sovereignty anymore. The UK regime has effectively removed its own check/ balance.

This regime's actions meet criteria of human trafficking/ systemic persecutor and even a terrorist organisation—as defined by international law and even the UK Regimes own definitions of a terrorist organisation. The destruction of sovereign withdrawal mechanisms and legal redress routes indicates intentional design, not neglect.

Call for Protection and Redress

I request international recognition that my family and I are victims of politically motivated persecution. I request:

- Diplomatic immunity from the UK regime in lieu of restoration of freedom & sovereignty in Britain
 - Protection under international human rights conventions
 - The lawful restoration of my land, property, and child (and all fiscal costs)
 - Public inquiry into the judicial, political, and police corruption surrounding my case
-

Cultural and Demographic Context

I am a White, Welsh, Anglo-Saxon, Christian - of the British Isles. These identities, once part of Britain's cultural core, are now in measurable decline. I believe my family's targeting is not isolated but part of a broader, orchestrated campaign to erase native British cultural and familial continuity. This includes systematic land dispossession, intergenerational targeting, and state suppression.

I have met others with similar stories, silenced or exiled, unable to speak without risk. I speak on behalf of them too.

Final Statement

I served the British state under Oath for 22 years. I have never been convicted of any crime. I have honored my duty. I have been met with persecution for asking lawful questions, defending my family, and refusing silence.

This document is a truthful record of my experience and is submitted in good faith to protect others and pursue lawful redress. The historical record—including references in Parliamentary archives—is now being redacted or lost. I urge any party of integrity to preserve this testimony, investigate the facts, and protect my rights, my son, and our future.

Signed:

Sion Hywel Buckler
